Serving as an innovative collaboration hub for architects and designers, we foster creativity and innovation in the industry. Join Harshiil Pethani Studiouz in shaping the future of design with our forward-thinking approach and commitment to excellence.

Job Title: Senior Architect

Location- Mumbai

Position Overview The Senior Architect role entails leading design processes for diverse projects, collaborating with clients to deliver innovative solutions. Mentoring junior team members, overseeing project coordination, and ensuring design excellence and schedule constraints are key responsibilities

Job Description

We are currently seeking a seasoned Senior Architect to join our esteemed design and architecture studio. As a Senior Architect, you will spearhead the conceptualization, development, and execution of diverse architectural projects, ranging from residential to commercial ventures. Your role will be pivotal in ensuring the delivery of exceptional design solutions that exceed client expectations and industry standards.

Key Responsibilities

- Lead the design process for a wide array of architectural projects, from initial client meetings to project completion, ensuring adherence to project scope, budget, and schedule.
- Collaborate closely with clients to understand their vision, requirements, and objectives, and translate them into innovative and functional architectural designs.
- Manage and mentor a team of architects, designers, and draftsmen, providing guidance and support to foster their professional growth and development.
- Oversee the preparation and production of architectural drawings, specifications, and construction documents, ensuring accuracy, clarity, and compliance with regulatory standards.
- Conduct thorough site assessments and analysis to inform design decisions, resolve technical challenges, and optimize project outcomes.
- Coordinate with external consultants, contractors, and vendors to integrate structural, mechanical, and electrical systems seamlessly within architectural designs.
- Drive excellence in design through continuous research, exploration of new materials, technologies and integration of best-in-class design methodologies.
- Manage project budgets, timelines, and resources effectively, monitoring project progress, identifying risks, and implementing mitigation strategies to ensure successful project delivery.
- Act as a primary point of contact for clients, consultants, and project stakeholders, facilitating clear and open communication channels to address concerns and maintain project alignment.
- Contribute to business development efforts by participating in client presentations, proposal development, and networking activities to cultivate and expand client relationships and project opportunities.

Must Have

- Bachelor's or Master's degree in Architecture from an accredited institution.
- Minimum 8-12 years of progressive experience in architectural design, with a strong portfolio showcasing successful project leadership and execution.
- Proficiency in industry-standard architectural software tools, including AutoCAD, Revit, SketchUp, and Adobe Creative Suite.
- Exceptional design acumen, with a demonstrated ability to translate conceptual ideas into practical and aesthetically compelling architectural solutions.
- Proven track record in project management, with a keen understanding of project lifecycle, budgeting, scheduling, and resource allocation.
- Excellent communication, presentation, and interpersonal skills, with the ability to engage effectively with clients, team members, and stakeholders.
- Professional licensure as an architect preferred, with a commitment to continuous professional development and adherence to ethical standards.
- Strong leadership capabilities, with the capacity to inspire and motivate multidisciplinary teams towards achieving project excellence and client satisfaction.
- Deep knowledge of building codes, regulations, and industry standards, with a focus on ensuring compliance and quality assurance.
- A passion for innovation and design excellence, coupled with a collaborative and client-centric approach to architectural practice.
